Outpatient Substance Abuse Services

*Holistic and Multicultural
Counseling and Therapeutic Services
for Adults, Children and Families
in Their Community*

Enhancing Lives

MIND ~ BODY ~ SPIRIT

Outpatient Community Substance Abuse Services

Our goal is to provide comprehensive array of clinical, therapeutic support services that are community based Forensic Services.

With a Public Health focus. We go beyond hospitals and clinics in working with our patients holistically and multicultural. provide outpatient mental health services to children, adults and families who are under the jurisdiction of Family Court, The Department of Children Services, The Department of Youth Services, Schools and other government agencies. We help to address areas of patients' lives that include child welfare, family violence, immigration, adult criminal and juvenile justice, housing and homelessness, education issues, and disabilities within a clinical mental health framework.

Prevention Services

Prevention Services can include programs that target all residents in the community, programs that focus on particular groups of individuals who are at high-risk in a community, and coalitions that work with multiple systems in a community.

Youth Intervention

The Bureau of Substance Abuse Services funds two youth intervention programs that are designed to intervene with youth who have already begun to use substances and participate in risky behaviors. These programs include activities such as street outreach and youth organizing.

Outpatient Counseling

Outpatient Counseling provides treatment for adults and adolescents, their families, and/or their significant others who are affected by the use of alcohol or other drugs. Patient are assisted in gaining and maintaining skills for a substance-free lifestyle.

Services Include

- Assessment
- Treatment planning

Specialty Substance Abuse Blend Dialectic Behavioral Therapy (DBT):

Individual, group, and family

Eligibility: Any person with a substance abuse diagnosis or a family member/significant other who has concerns about someone else's substance abuse problem. Individual must be medically stabilized and not in need of acute inpatient services.

Day Treatment / Intensive Outpatient Treatment

Day Treatment and Intensive Outpatient Treatment are more intensive than Outpatient Treatment. Programs provide each patient with several hours of counseling per day, up to four days a week including: individual, group and family counseling, relapse prevention, communicable disease prevention, case management, and encouragement of the use of self help groups.

Eligibility: Patient must be medically stabilized and require more than once per week counseling to maintain stability.

Acupuncture Services

Acupuncture and recovery maintenance programs provide services for individuals with histories of substance abuse that require treatment for mild to moderate withdrawal symptoms. Services include limited medical screening and intake, motivational counseling/case management and acupuncture treatments.

Eligibility: Open to patient with mild to moderate withdrawal symptoms. Service is not appropriate for clients in need of a medically monitored detox.

Aftercare/ Recovery Support

Aftercare/ Recovery Support Services provide case management services to help link individuals and families to community supports such as self-help, housing, educational/vocational services and employment.

Eligibility: Patient who have been sober for at least three (3) months, and have a severely limited ability to live independently because of a lack of income, diminished social skills, and/or insufficient social supports. Community Housing programs identify the targeted population as homeless families and individuals affected by substance abuse.

Peer Recovery Support

Aftercare/ Recovery Support Services provide case management services to help link individuals and families to community supports such as self-help, housing, educational/vocational services and employment.

Supportive Case Management

The overall goal for Supportive Case Management is to assist adults and/or families in recovery to help them achieve self-sufficiency. Substance abuse services for individuals who need community-based service coordination and support services. Through case management services within an alcohol and drug-free living environment that reinforces recovery through establishing community-based supports to maintain ongoing goals in the recovery process. Help with supportive housing and community housing to increase the likelihood they will be successful in achieving permanency within the community while reducing relapse.

Community-Based Clinical Case Management

Community based case management programs provide support services for substance abusers throughout the course of recovery and aftercare. Case management services enhance access to care, provide additional support for patients to improve treatment outcomes and help clients develop community contacts and supports for long-term recovery.

Eligibility: Patient who are currently not utilizing, or have difficulty accessing, traditional substance abuse treatment services, experiencing chronic unstable housing and persons with histories of chronic relapse.
